#### 6.Flow Chart

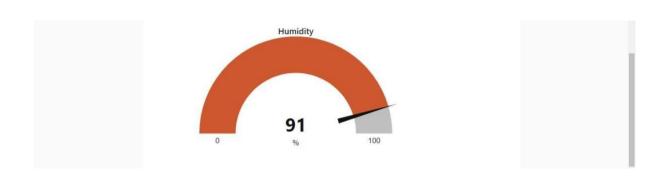

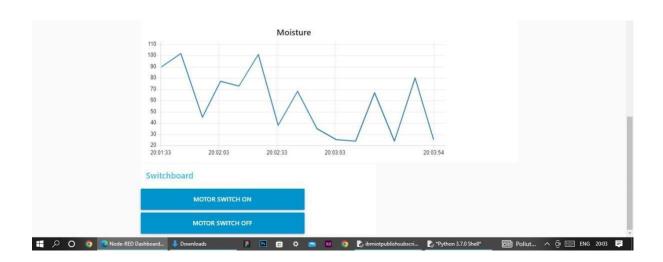

#### 7. Observations & Results

### 8. Advantages & Disadvantages Advantages:

### **Advantages:**

- Farms can be monitored and controlled remotely.
- Increase in convenience to farmers.
- Less labor cost.
- Better standards of living.

## **Disadvantages:**

- Lack of internet/connectivity issues.
- Added cost of internet and internet gateway infrastructure.
- Farmers wanted to adapt the use of Mobile App.

#### 9.Conclusion

Thus the objective of the project to implement an IoT system in order to help farmers to control and monitor their farms has been implemented successfully.
